GOLD MINING IN INDIA.

DIVIDENDS OF 65 AND 25: PMR CENT. Shareholders in the three principal dividend paying Indian mining companies have no cause for dissatisfaction, either with the results of the last year or with those of the first three months of 1892. The Mysore Company, it is true, shows a slight falling off in the output for the past quarter, the yield of gold being 15,735 oz., as compared with 16 289 oz. for the same period in 1891; but this falling off is far more than compensated by the largely increased returns of the Nundydroog and Coregum Companies, which produced 7,608 os, and 10,746 oz, respectively this year as against 4,440 oz. and 8,807 oz. in the corresponding three months of 1891. We have had the reports of all three for the past year, and i must be admitted that, in spite of cholera and influenza epidemics and a prolonged drought, they read very well indeed. Note little of the excellent showing that they make is, no doubt due to the careful management of those to whom the work is entrusted, and who fully deserve the unqualified praise that they have received from their directors. The record for the last three years is one of continued improvement -most striking, perhaps, in the Nundydroog Mine, but almost equally substantial in the other two. It is no exaggeration to say that in facof the exceptional difficulties of last year th results achieved were highly remarkable, and justify very sanguine hopes for the future. The following table shows the gold output and its progressive character from 1889 to 1891 :--

Mysore 49,234 58,181 66,499 Ooregum ... 15,925 27,350 34,582 Nundydroog 5,840 15,634 23,592 The production of gold by the Mysore Com pany, therefore, was 8,318 oz. larger in 1891, while the output of the Coregum increased by 7,232 oz. and that of the Nandydroog by question. 7.958 oz. In the current year the production of the two latter mines will increase still moreas indeed, is already shown in the returns of the first three months for twenty more stamps commenced work on March 14 at the Opregum Mine, and an addition of a similar number of stamps is being arranged for on the Nundydroog

To begin with the Mysore Gold Mining Company, there is the gratifying feature that. dthough there was an increase of only 1.541 tous of quartz crushed and 2,286 tons of failings treated last year, there was an increase 1,039 oz. of gold, which shows that the quality of the are was considerably higher than in the previous year, being, in fact, 1 oz. 10 dwt. 11 gr. er ton, as against 1 cz. 7 dwt. 2 gr. per ton in per cent : but as this distribution compares with individual." one of 75 per cent, in 1890, it is well that shareholders should remember that what used formerly to be charged to capital account was last year charged to revenue. An extraordinary smount of exploratory work was done the distance opened in shafts, levels, winges, and rises during the year amounting to no less than .581 ft.—that is, nearly, 11 mile. The cost of anch extensive development operations, a great part of which was charged to revenue, sufficientaccounts for the difference in dividend in 1890 and 1891. As regards the Ooregum Mine. the average yield from the quartz was 2 oz. dwt. per ton, and the Preference shareholders received 271 per cent, and Ordinary 17; per cent: as dividends for 1891, the profits showing an increase of \$14.132 over the previous year. The total dividendapaid for the year on Mundydroog shares amount to 5s. on the fully-paid shares, or 25 per cent as again, there is the welcome feature of the quality yield per ton of quartz being 1 oz. 19 dwt. 12 gr. last year, sgainet I cz. 12 dwt. 22 gr. in 1890.-Financial News.

OLLA PODRIDA

The Daily News says .- A notable example of the "three black crows "class of flotion comes from Yorkshire. A Searborough elergyman on opening his newspaper the other day found there in an utterly unfounded statement to the effect that his consort had presented him with triplets. He immediately caused inquiry to be made as to the source of thir astounding story; and he found astonishing is the fact that Russia, exclusive of it was as follows:—His married daughter and Finland, is third, with 7 427 publications. her children had arrived at his house on a visit; England in fourth, with 4,591. The United the event had been described by one neighbour States shows only 4,631. From these statistics to another as "an addition of three to the ministor's family; by the natural law of evolution to those of Italy and Russia combined, and also On that was transformed into a case of triplets; and meanly equal to the combined records of Bussia, a local correspondent getting Hold of the story England, and the United States ... cout it in that form to the newspapers.

the indebtedness of the firm which was associated in the Grapels are treated as a subject, and this riage of coloured men to white women has alwith amazing variety. dinals met, on Thursday last to consider the Athens correspondent) has arisen between charges against the Archbishop. The decision Greece and Rouminia. About twenty years is entirely in favour of Archbishop Ireland in ago there died a rich Greek merchant, a native of Epirus, who had amassed in Roumania a fortune of about ten million france. This sum he left for the advancement of agriculture and industry in Greece on the decease of his cousing who was given a life interest in the estate. This gentlemen died recently, and the Roums-The Greek Government has protested against this action, and has even throatened to break off THE SERTENCE ON DEEMING: THE PRISONER'S relations. The Greek and Roumanian newspapera at no time remarkably polite to one another, have taken up the oudgels on the subject with more than ordinary vigour.

> Mr. Brinsley Richard, whose death in th rime of life soon after his appointment to the important post of correspondent at Berlin to the Times, was a splendid reconteur. His recol lections, which appeared in the shape of a volume called " Seven Years at Eton," will doubtless be supplemented. Here is one of his stories about the Marquis of Lorne, whom he described of not of very mirthful mood, "but he had a fund of playful humour." "Once, having leave to go to London, he went to the Windsor Station to catch a train, but found he ought to have gone to Slough. It happened to be during Ascot week, and all the vehicles of Windsor being under requisition, it was with some difficulty that Lorne discovered an old fly with a sorry-looking herse. What's your fare to Slough? he asked, as he was about to step in. Ten shillings, Sir; I can't take a penny less to day, was the driver's answer. I didn't ask you for the price of your horse, retorted Lorne, turning away."

A regular campaign (says the Vienna correspendent of the Standard) has been opened by light N.E. winds; thence to port N.E. winds, the Supreme Sanifary Board of Hungary against | moderate with rain. the fashion of trained dresses.
